## Baldwin Park Hosts Groundbreaking Ceremony for Final Construction Stage of the Baldwin Park Greenway Phase I

**BALDWIN PARK, CA** – The City of Baldwin Park is excited to invite the community to a special groundbreaking ceremony marking the final stage of construction for Phase I of the Baldwin Park Greenway! The ceremony will take place on Thursday, April 3, at 11 a.m. at Walnut Creek Nature Park (701 N. Frazier Ave.). Light refreshments and food will be served.

“This groundbreaking ceremony marks a significant milestone for the City,” said Baldwin Park Mayor Alejandra Avila. “The Baldwin Park Greenway has been eagerly anticipated, and we are thrilled to start work on the final landscaping and amenities as we prepare for its grand opening!”

Phase I of the Baldwin Park Greenway is a 2.5-mile protected pathway that runs along the San Gabriel River, connecting Ramona Boulevard to Walnut Creek Nature Park. Designed for both recreation and connectivity, this car-free, ADA-accessible route ensures a safe and scenic experience for walkers, runners and cyclists alike.

As part of this final phase of construction, the City will enhance the Greenway with native, drought-tolerant landscaping and a range of amenities designed to improve user experience. These improvements include water fountains, benches, ample lighting along the path and at entrances, bicycle repair stations, picnic areas and more!

Construction is expected to be completed by June 2025.

“This project is a true reflection of our commitment to expanding green spaces and providing safe, accessible transportation options for our residents,” continued Mayor Avila. “Once completed, it will serve as a key recreational and environmental asset for Baldwin Park, offering a scenic, car-free route that connects important destinations while preserving our natural surroundings.”

The Baldwin Park Greenway is part of a larger vision to expand pedestrian and cyclist-friendly infrastructure throughout the city. A future 2.8-mile extension will extend the Greenway from Walnut Creek Nature Park to Hilda L. Solis Park, creating a comprehensive five-mile network of connected pathways.

The City extends its appreciation to all staff, project funders and partners for helping realize the Baldwin Park Greenway. This project was made possible through funding support from the California Statewide Park Development and Community Revitalization Program, L.A. County Proposition C, California Transportation Development Act, a Los Angeles County Metropolitan Transportation Authority 2009 grant, the California Natural Resources Agency and the San Gabriel and Lower Los Angeles Rivers and Mountains Conservancy.
